    - Physical characterization
      - - Molecular weight 487
    - Production 245 f, 506 ff
    - Property 490, 499 ff
    - Pseudoplasticity 503
    - Rheology 489
    - Secondary structure 488
    - Viscosity 499
    - Weak network formation 500
      - 511
      - 49, 494, 496 f
    - Xanthan 483, 485, 511
    - Xanthan biosynthesis 45
      - ATCC 31600
    - Xanthan 504
      - ATCC 31601
    - Xanthan 504
      - ATCC 31602
    - Xanthan 504
      - NRRL B-1459
    - Xanthan production 497
      - NRRL B-12075
    - Xanthan 504
      - pv. 492
  - Xylanase 588
    - Bleach boosting 587
    - Textile processing 586
  - Xylogalacturonan 356
- z**
- 710
  - 460
  - Cupin protein 722
  - $\kappa$ -Carrageenase 99
  - Marine bacteria 98
    - 38
  - 49
  - Zyderm™ 544
    - IFO1130
  - Inhibitionly  $\epsilon$ -PL 675
  - Levan 325 f, 333
  - Levan biosynthesis 331
  - Levan production 337 f, 342
  - Levansucrase 331
  - Zyplast™ 544
